Agility Equipment Price List

The obstacles are made with aluminum which imparts durability, easy maintenance, and light weight. Contact obstacles are made with Polyolefin (instead of the traditional Plywood), this is a sheet of plastic made of recycled materials that is waterproof and resistant to extreme environmental conditions. These obstacles are only made on special orders. Please allow several weeks for delivery. All the prices are in Canadian money and do not include taxes. Shipping fees, if needed, will be added to this price and will vary on the weight, the chosen service and the destination.
